Zeta adapts to today's fast-paced, evolving marketing industry

What Zeta does?

- ✓ Zeta unifies customer data, identity, and AI-driven insights, then activates **personalized campaigns across channels** like email, social, CTV, display, video, mobile, and in store
- ✓ Its Generative AI (GenAI)-driven marketing solutions enable brands to personalize experiences at scale, measure impact with precision and optimize marketing spend to **increase return on investment**
- ✓ A **single platform** designed to **enable enterprises to acquire, grow and retain consumer relationships more efficiently and effectively** than alternative solutions available in the market

Revenue Breakdown

Platform

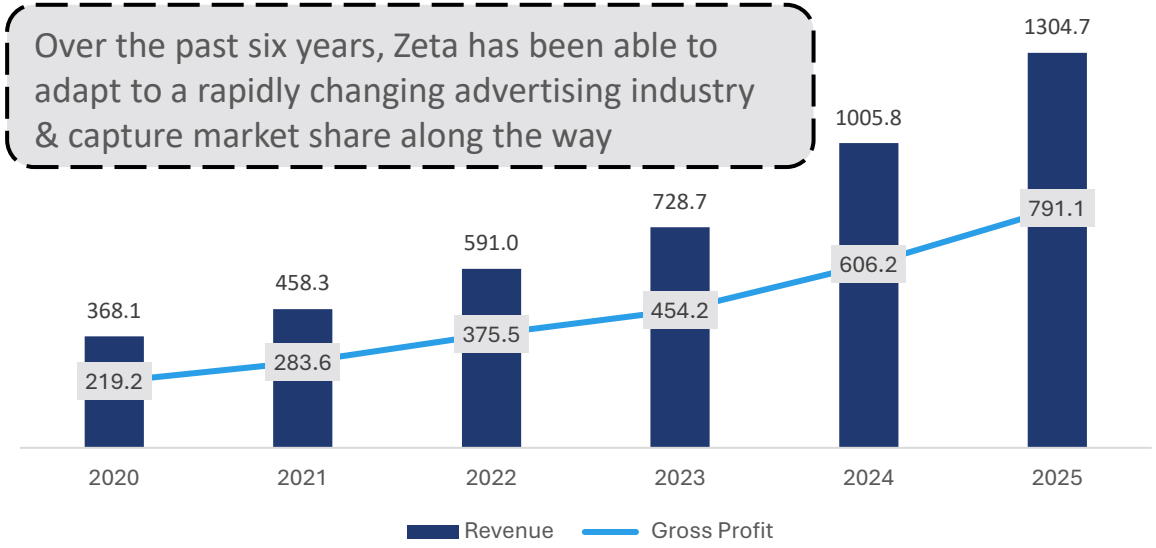

Geography

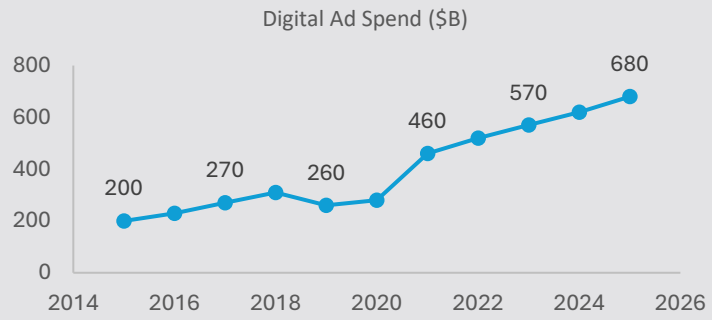

Customer Verticals

Over the past six years, Zeta has been able to adapt to a rapidly changing advertising industry & capture market share along the way

Marketing spend keeps exceeding expectations but how efficient are they? This is where Zeta comes in

Marketing Industry Spend

8-12% CAGR

Global digital advertising spend: $600B+

Digital advertising is a large, fast-growing market with increasing demand for data-driven targeting

Industry Problems

- **Low Marketing ROI -** ~50%+ of digital ad spend is wasted due to poor targeting and attribution
- **Fragmented Data Ecosystem -** Customer data spread across CRM, ad platforms, and analytics tools
- **Limited Personalization -** Legacy systems rely on broad segmentation instead of individual-level targeting
- **Declining Signal Quality -** Loss of third-party cookies reduces targeting accuracy and measurement

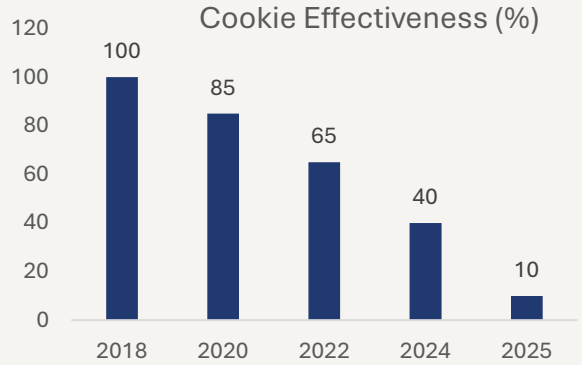

Key Industry Trends

Shift to First-Party Data

AI-Driven Personalization

Omnichannel Marketing

Real-Time Data Activation

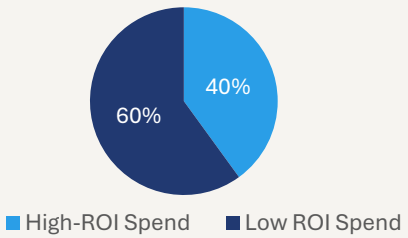

- **Lower targeting precision** → Cookie loss reduces campaign effectiveness
- **Higher CAC** → More spend needed to drive conversions
- **Shift to first-party data** → Brands prioritize owned data ecosystems
- **AI-driven platforms gaining share** → Better personalization and ROI (e.g., Zeta)

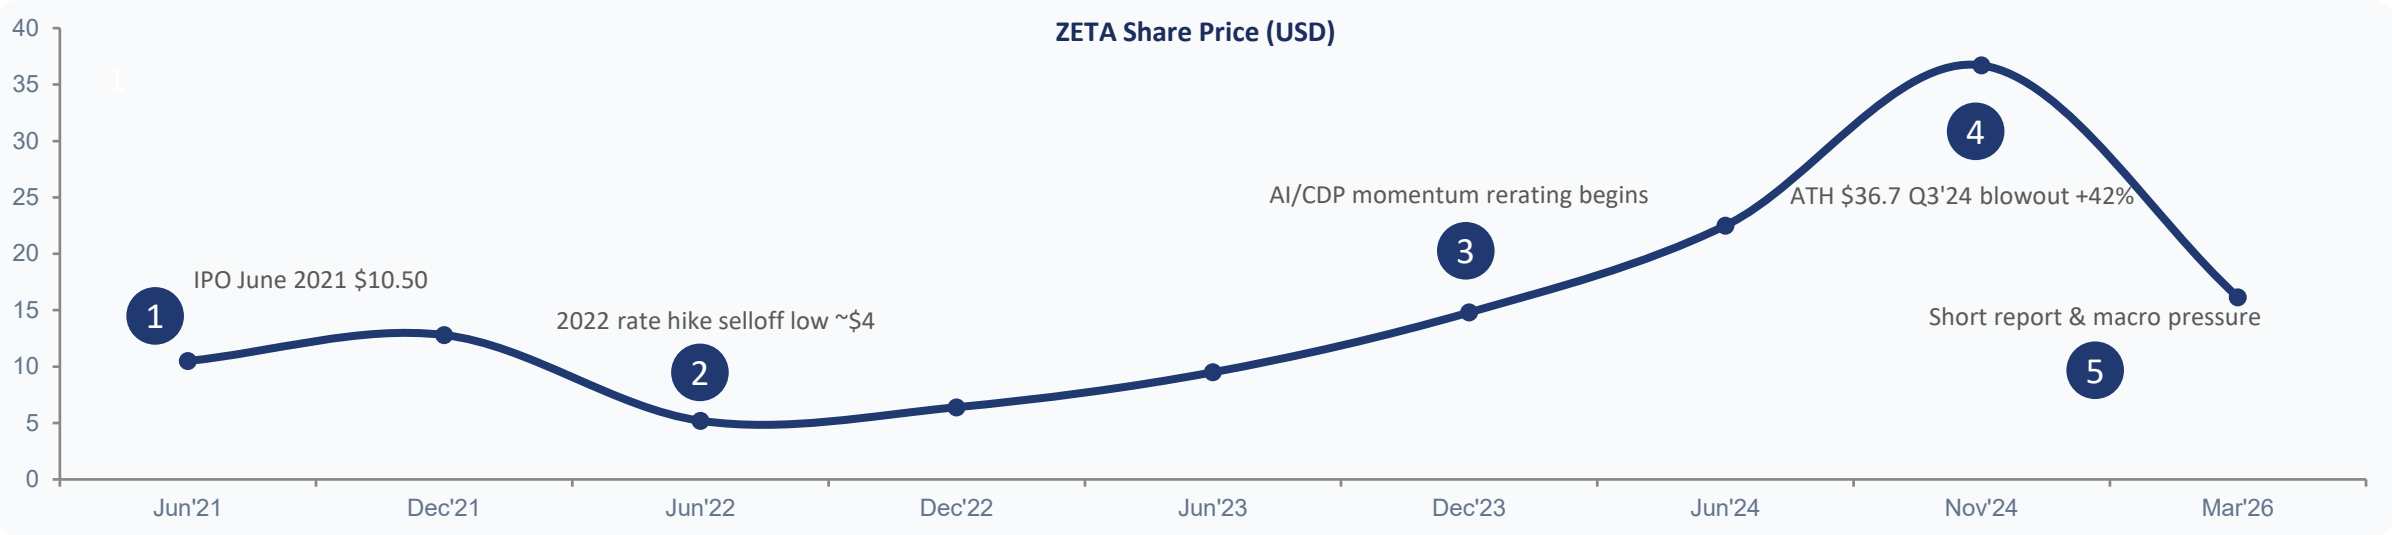

Marketing Inefficacy Causes

- **Fragmented and siloed data** limits a unified view of the customer journey
- **Poor attribution models** hinder accurate measurement of campaign effectiveness
- **Outdated targeting methods** reduce personalization and precision
- **Inefficient spend allocation** leads to wasted ad dollars and suboptimal ROI

Marketing Spend by Measurable ROI

Zeta is overlooked for its nascent financials, but core business metrics pose an attractive proposition

I. Underappreciated Catalysts

- ✓ The market is overlooking major catalysts that are set to help Zeta **maintain / outpace its already robust growth rates**
- ✓ We believe that World Cup, 2026 Mid-term Election, Winter Olympics, and more will **expand TAM, providing runway for Zeta to capture market share and opportunity for further** domestic and international expansion

II. Operational Improvements

- ✓ Zeta continues to make incremental strides towards **optimal operational structure**, reducing its customer acquisition costs while growing and retaining its super-scaled customers
- ✓ We believe its recent acquisition of Marigold, in addition to AI Agents will **expand the margins & wallet share per customer** (measured by NRR)

III. Unmatched Data Moat

- ✓ Zeta's database of 1B+ consumer profiles took 20 years to build and **cannot be copied**. Unlike competitors who lost their data edge when tracking cookies were eliminated, **Zeta owns their data free and clear**
- ✓ This means smarter AI, **better results for clients**, and a platform that compounds in value the longer a customer stays

World Cup is a near-term tailwind; companies are expected to flock money to win domestic and int'l consumers

The World Cup is the **single largest advertising event globally,** bigger than the Super Bowl in total spend. Companies and brands like Coca-Cola, Nike & McDonald's **dramatically increase marketing budgets** in World Cup years. These are Zeta's Fortune 500 targets and existing customers.

~$8B
Global digital ad uplift

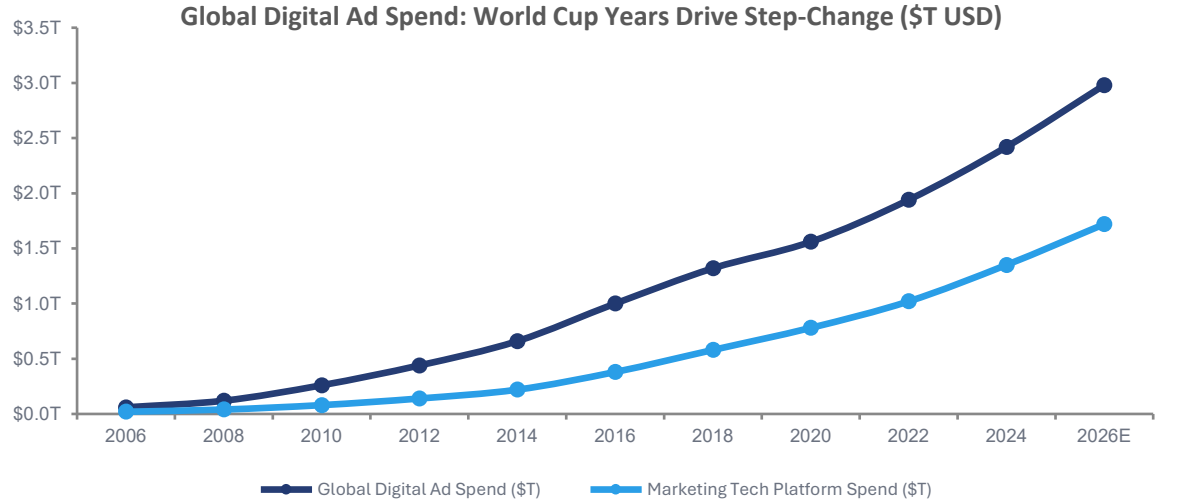

$10B+
Est. World Cup Ad Spend

$1T+
Global digital ad spend

Month-long window
Unlike the Super Bowl, the World Cup creates 30+ days of elevated consumer attention — brands run broader acquisition campaigns, more programmatic spend, more email and CTV.

ROI pressure = Zeta demand
CMOs spending heavily on World Cup campaigns face intense pressure to prove attribution. That's when they turn to data-driven platforms like Zeta to measure and optimize spend.

Halo effect on digital budgets
World Cup years drive a step-up in digital ad budgets that doesn't fully revert. Brands that experiment with new channels tend to keep using them — structural lift, not a one-time bump.

Commentary

- ✓ The market is overlooking major catalysts that are set to help Zeta **maintain / outpace its already robust growth rates**
- ✓ Structural growth, not one-time boost. Spend levels remain elevated post-event, supporting sustained industry tailwind
- ✓ We believe that World Cup, 2026 Mid-term Election, Winter Olympics, and more will **expand TAM, providing Zeta to capture market share and opportunity for further expansion** domestically and internationally
- ✓ Marketing tech spend outpaces overall ad spend, signaling a shift toward data-driven platforms like Zeta
- ✓ Large enterprise budgets disproportionately increase, benefiting **Zeta's focus on Fortune 500 clients**

Many close election races across the U.S. is set to boost marketing spend as politicians prepare for campaigns

Key Battlegrounds

GA — Georgia

SENATE · TOSS-UP | **Ad Spend: VERY HIGH**

D Jon Ossoff (D)

R TBD — Rep. primary (Carter/Collins/Dooley)

Ossoff is the lone Dem senator seeking reelection in a state Trump won in 2024. Contested GOP primary = double the ad spend. Georgia has been a perennial money pit since the 2020 runoffs.

NC — North Carolina

SENATE · OPEN SEAT | **Ad Spend: VERY HIGH**

D Roy Cooper (D)

R Michael Whatley (R) — Trump endorsed

Tillis retiring = open seat. Open seats always attract more spend than incumbent races. Cooper is a strong candidate; Whatley has instant Trump backing. Both sides fully invested.

MI — Michigan

SENATE · OPEN SEAT | **Ad Spend: HIGH**

D Crowded 3-way primary (El-Sayed / McMorrow / Stevens)

R Mike Rogers (R) — Trump endorsed

Peters retired, triggering a bruising Dem primary stretching into August. A contested primary + competitive general = double the ad spend cycle. Both sides spending heavily.

ME — Maine

SENATE · COMPETITIVE | **Ad Spend: HIGH**

D Janet Mills / Graham Platner (D primary)

R Susan Collins (R) — 5-term incumbent

Collins is a perennial target in a state that voted against Trump all three times. Trump has called for her defeat, which supercharges Dem small-dollar fundraising into this race.

Setting the Stage

9	43	2
Senate battlegrounds	House toss-ups	Special elections

Contested inventory for digital ad targeting

9 Senate battlegrounds + 43 House toss-ups = record political ad spend. Both parties face existential stakes — Republican tax cuts vs Democratic oversight power.

Democrats historically over-index on digital

Center for Politics: Democrats have historically over-indexed on digital/data-driven advertising vs Republicans — plays directly to Zeta's platform strengths and premium pricing.

Large, expensive media markets

Georgia, Michigan, NC and Maine are states where Zeta's data-driven targeting at scale commands premium pricing. These aren't small states where TV dominates.

Revenue at least in line with FY2025 growth of 20%

Given the looming tight elections, we expect political revenue to exceed 2022 midterms, and 2022 was already a significant revenue contributor for Zeta.

Zeta remains focused on operational efficiencies; core business is their main focus

Customer Acquisition Efficiency

AI-driven targeting and first-party data improve conversion rates, **reducing customer acquisition costs** and increasing marketing ROI.

Platform & Cost Structure Optimization

High-margin **(-60%+)** software model and scalable infrastructure enable operating leverage as revenue grows.

Expansion Within Existing Customers

111%+ NRR driven by cross-selling and multi-product **adoption increases** wallet share and reduces reliance on new customer acquisition.

Marigold + AI Agents Synergies

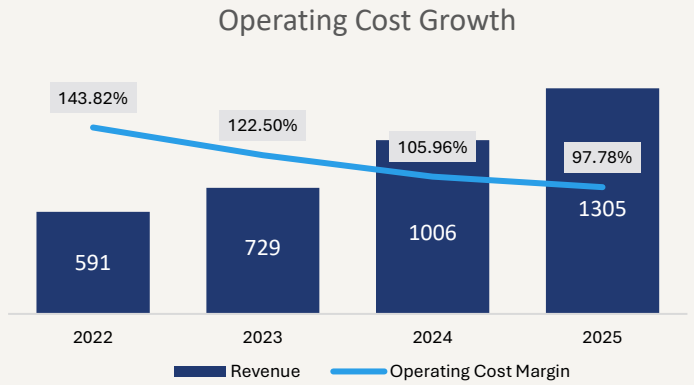

Expands customer base and product suite, enabling cross-selling, improving customer retention, and increasing platform utilization, driving higher margins and operating leverage

Driving Growth

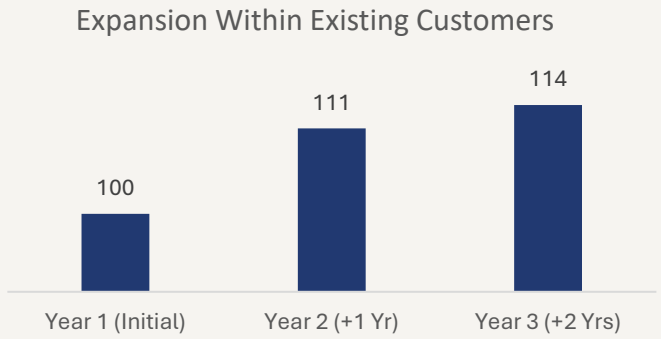

- AI Agents automate campaign execution improving ROI
- Higher platform utilization raises revenue per customer
- Drives expansion revenue

The improvement of unit economics drive operating leverage, expanding margins as revenue scales

- Higher efficiency → lower CAC / higher ROI
- Expansion revenue → higher-margin growth vs new sales
- Scalable platform → fixed costs are leveraged over growth

- Revenue scaling into fixed cost base
- Cost structure stabilizing as platform scales
- Revenue surpasses operating cost in 2025, leading to operating leverage
- Revenue becomes increasingly profitable as the platform scales

- 111%+ NRR indicates strong expansion within existing customers
- Growth driven by increased usage and multi-product adoption
- Expansion revenue requires no incremental CAC
- Higher-margin revenue stream supports operating leverage

Thesis III: Unmatched Data Moat

Superior platform that's world class paired with robust data base

20 Years of Data–Impossible to Copy

Zeta's database of 1B+ consumer profiles took two decades to build. A competitor starting today would need until 2045 just to match it. This isn't a feature — it's a fortress.

They Own Their Data Outright

When Google and Apple eliminated third-party tracking cookies, most ad platforms lost their targeting edge overnight. Zeta didn't flinch—because they never relied on borrowed data in the first place.

Gets Smarter With Every Customer

Every new client adds more signals, more behavioral patterns, and more AI training data. The platform compounds in value over time—making Zeta harder to replace the longer a customer stays.

How Zeta Acquires Data

Owned Web Properties

650M+ monthly visitors across Zeta-owned sites & publisher network

Purchase & Transaction

Real buying signals from retail & e-commerce partners

Co-registration

Consumers opt-in directly through Zeta's data collection portals

Mobile & App Signals

In-app behavior, location, and device-level identity matching

Email & Identity Graph

775M+ mapped email addresses linked to persistent profiles

AI Signal Enrichment

ML layers infer intent & enrich raw signals in real time

How Zeta Keeps Acquisition Costs Low

First-Party Data Eliminates Vendor Cost

No reliance on third-party data brokers, reducing ongoing acquisition spend and improving data quality.

AI Improves Targeting Efficiency

Machine learning optimizes campaigns in real time, increasing conversion while lowering cost per acquisition.

Owned Channels Drive Near-Zero CAC

Traffic from owned properties and email ecosystem generates leads without incremental marketing spend.

Scale Drives Operating Leverage

Fixed data infrastructure costs spread across more customers, reducing marginal cost per profile over time.

All-in-one platform makes it a seamless experience for its customers

Unlike legacy marketing clouds that rely on fragmented third-party data and stitched acquisitions, Zeta owns a proprietary identity graph of 200M+ consumers and processes billions of signals daily. This enables superior targeting, real-time personalization, and seamless cross-channel execution within a single unified platform.

How Zeta Gets Paid

1 Usage-Based & Volume Fees

Customers pay based on how much they use the platform, and there are several pricing flavors within this: Cost per thousand impressions (CPM), Cost per lead / cost per click (CPL/CPC), Fixed cost per mile (email volume), etc.

2 Subscription Fees

Contracts are fixed monthly or annual subscriptions for platform access, particularly for the customer data platform product where customers are essentially licensing access to Zeta's data enrichment and identity resolution capabilities.

3 Professional Services

Implementation fees, consulting, custom integrations, and data onboarding work

Key Customer Vertical

Technology — Apple, Google, Samsung, Meta

Personalized acquisition & re-engagement at massive scale across digital channels.

Telecom — Verizon, AT&T, T-Mobile, Comcast

Churn reduction and upsell campaigns powered by behavioral identity data.

Financial Services — Amex, Discover, Chase, Citi

Compliant targeting for card acquisition, loan offers, and wealth management.

Auto & Retail — Toyota, Ford, Victoria's Secret, Target

In-market buyer signals and loyalty campaigns driving foot traffic and conversions.

Healthcare — CVS, Cigna, Walgreens, Humana

HIPAA-conscious targeting for patient acquisition, plan enrollment, and wellness.

Media & Entertainment — Warner Bros., Disney+, Spotify, Peacock

Subscriber acquisition and content-driven retargeting across CTV and streaming.

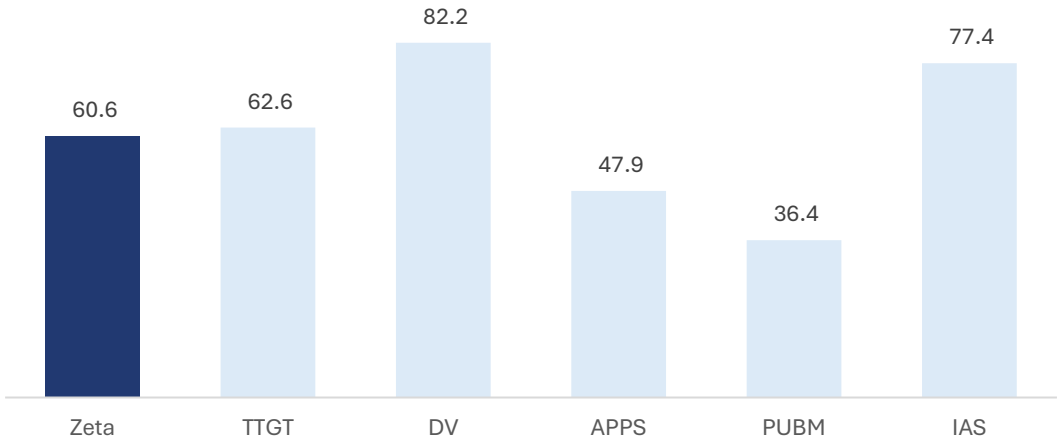

E-Commerce & DTC — Wayfair, Chewy, Fanatics, Priceline

Cart abandonment, LTV optimization, and lookalike prospecting at scale.

EV / EBITDA

Equipped to handle short-term, medium-term, and long-term headwinds

Risks	Mitigants
➢ **Data Privacy & Regulatory Risk** Increasing government regulation may restrict data collection and usage, impacting targeting and monetization.	First-party, opt-in data model aligns with privacy laws and **reduces reliance on restricted data** sources. → Positioned to **benefit** as regulations tighten
➢ **AI / Product Innovation May Not Drive Monetization** AI capabilities (agents, predictive targeting) may not translate into meaningful revenue or margin expansion.	**Zeta's AI is already** embedded in a customer acquisition + retention workflows, driving measurable ROI. → not speculative, **already monetized**
➢ **Stock Based Compensation** Dilution of stocks results in management holding significant decision-making powers.	Supports **retention of key talent**, with dilution **expected to decline** as a percentage of revenue as the company scales. → Near-term dilution offset by **long-term margin expansion**
➢ **Customer Concentration / Long Sales Cycles** Dependence on large enterprise clients + long deal cycles creates revenue volatility.	Zeta's platform is embedded within enterprise marketing stacks, driving high switching costs and strong net revenue retention. TOYOTA UNITED SAMSUNG T-Mobile BMW
➢ **Dual Class Structure Imbalance** B class shares have a 10 to 1 voting structure resulting in B class owners having more control over the company than class A owners (public shareholders).	Founder-led control **enables long-term execution**, with ownership helping align **incentives** with shareholders. → Supports consistent strategy in a rapidly evolving AI landscape

What moves the needle?

Summary of Estimate Variance

KPI	Street Consensus	Our View	Source of Variance	Impact
EBITDA Margin	~8% (consensus)	**~16% by FY2027**	✓ Street margins compressed due to M&A ✓ Stabilizing S&M and SG&A	EBITDA > Consensus
Revenue Growth	~20–21% organic	**25–30% incl. tailwinds**	✓ Midterm Election Spend ✓ World Cup Ad Surge ✓ Marigold Synergy	Rev > Consensus
NRR	~115–120% flat	**128%+ sustained**	✓ Marigold Cross-Sell Platform Expansion ✓ Shift towards super-scaled customers	Rev & EBITDA Beat
FCF Conversion	~60–65% of EBITDA	**65–70% by FY2027**	✓ SBC Normalization ✓ OpEx Leverage	FCF > Consensus

Attractive Near-Term Catalysts

Q1 2026 — 1 — Marigold Integration Beat

- Organic growth 20%+ ex-Marigold; integration synergies ahead of schedule
- Expect margin expansion to 22%+ as one-time costs roll off
- Fortune 500 cross-sell pipeline building, super-scaled count to 200+

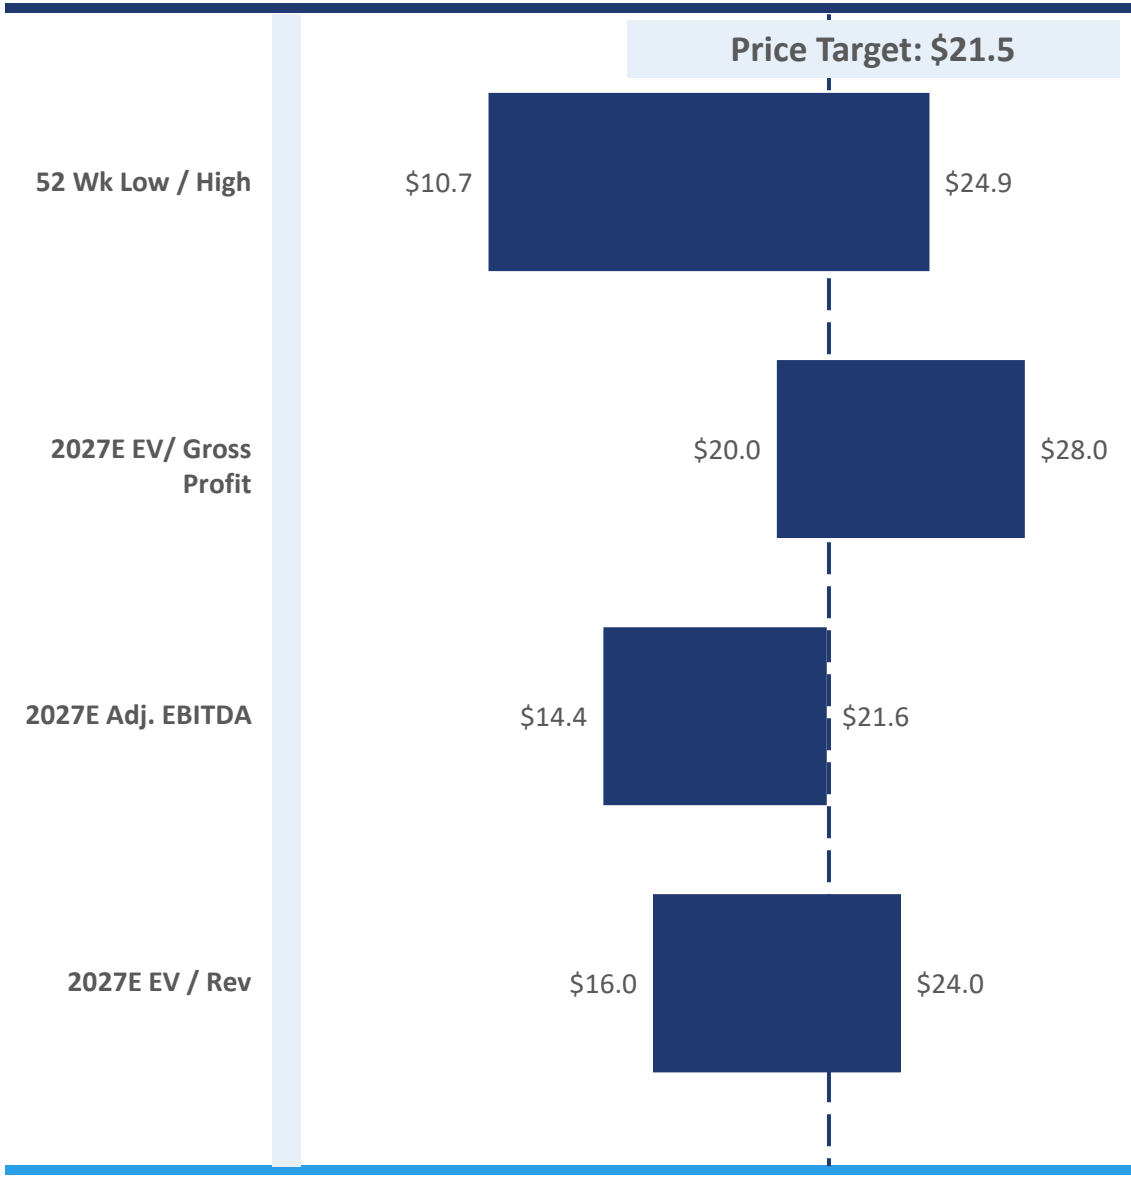

Mid 2026 — 2 — 2026 Midterms + World Cup Ad Surge

- 9 Senate battlegrounds + 43 House toss-ups = record political ad spend
- FIFA World Cup (US host) drives Fortune 500 brand marketing budgets
- Political revenue historically under-modeled by consensus

H2 2026 & Beyond — 3 — Athena AI Platform Monetization

- OpenAI partnership legitimizes Athena, expanding enterprise pipeline
- AI-driven NRR expansion: 128% → 130%+ as platform deepens
- SBC drops from $151M (2026) to $70M (2027), quality of earnings improves

Revenue growth to remain robust and margins to expand further

Valuation Outlook

- Our Dec '27 **price target of $21.5** is based on the average base prices
  - With upcoming major catalysts (World Cup, Midterm Election, & Concerts), we're expecting **a continuation of robust revenue growth of 20% - 30% for next two years**
  - Our revenue projections are further supported by continuation of initiatives that Zeta is (and will) take to **improve operational practices, thus lowering its operating expenses each quarter**
  - In addition, Zeta's economic moats will help **grow and retain customers in a pivotal year** with looming catalysts, **underpinning Zeta's growth rates**
- With synergies to be realized in coming quarters, **margins, especially for Adj. EBITDA, are expected to expand** beyond what the consensus are forecasting. **Positive trend of NRR along with lower customer acquisition cost** will drive operating, SG&A, and other expenses lower

ZETA GLOBAL

Marigold Acquisition

Closed Nov. 24, 2025

Deal Value

$325M

aggregate consideration

$100M cash + $100M stock + $125M seller note

What Was Acquired

- Marigold Loyalty – cloud-based loyalty engine
- Cheetah Digital – cross-channel campaign platform
- Selligent, Sailthru, Liveclicker, Grow
- SMB units (Campaign Monitor, Emma, Vuture) excluded

Marigold Key Figures

- 100+ global enterprise brand clients
- 20 of top 100 global advertisers
- 40+ Fortune 500 companies
- >90% subscription-based revenue (FY2025)
- Cost of revenue <30% (FY2025)

Strategic Rationale

- Expands EMEA footprint; new APAC entry point
- Cross-sell to Zeta's 567 scaled customers
- Loyalty product added to Zeta's suite
- Accretive to adj. EBITDA & FCF in year one
- Incremental to Zeta's 2028 targets

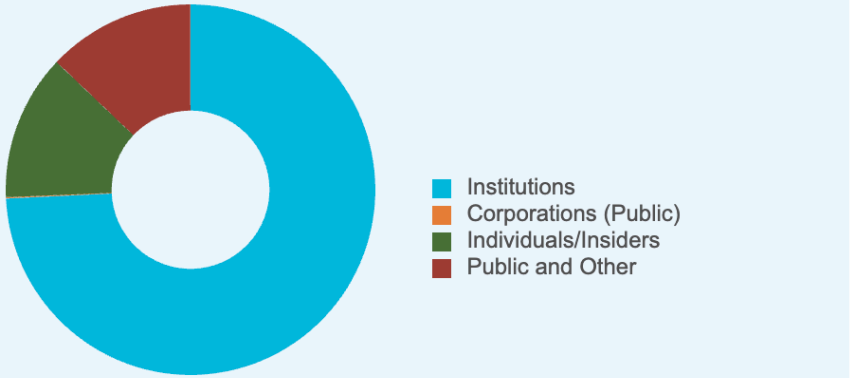

Management & Guidance Impact

- Michael Gordon (Marigold CEO) stays on to lead SMB businesses; enterprise team transitions to Zeta
- Marigold adds ~$190M revenue to Zeta's 2026E guidance (at least)
- 2026E total rev. guided to $1.73B+
- Mgmt. expects ROI uplift: 6x → 10x+ over time
